

DLMSO

November 6, 1997

MEMORANDUM FOR: DISTRIBUTION

SUBJECT: Revised Request for Implementation Date (RFID) on
Proposed MILSTRIP Change 40, Processing Cooperative
Logistics Supply Support Arrangement (CLSSA)
Requisitions (DLMS Supply/MILSTRIP)

The attached change to DoD 4000.25-M, DLMS, Volume 2, and DoD 4000.25-1-M, Military Standard Requisitioning and Issue Procedures (MILSTRIP), is forwarded for evaluation and submission of a single coordinated Service/Agency implementation date.

This change was approved during the November 18-22, 1996 Supply Process Review Committee (PRC) meeting and was initially staffed as an RFID on June 3, 1997. The original RFID did not accurately reflect all requirements. This revised RFID reflects changes discussed at the September 3-12, 1997, Supply PRC meeting and subsequent agreement by the Components. Double underscore and strikeout lines are used to highlight procedural changes resulting from the September PRC meeting.

Request the attached change be reviewed and your implementation date be provided to reach this office not later than 45 days from the date of this memorandum.

The DLMSO points of contact are Ms. Ellen Hilert, Supply PRC Co-chair, DSN 427-6117, 703-767-6117, or e-mail: ellen_hilert@hq.dla.mil and Ms. Vermella Saváge, DoD MILSTRIP System Administrator, DSN 427-6127, 703-767-6127, or e-mail: vermella_savage @hq.dla.mil.

JAMES A. JOHNSON
Director
Defense Logistics Management
Standards Office

achment

**REVISED REQUEST FOR IMPLEMENTATION DATE
FOR PROPOSED MILSTRIP CHANGE 40**

ORIGINATOR:

a. **Service/Agency:** DLA/MMSLR

b. **Originator:** Ms. Nancy C. Rohr, Chief, Requirements Satisfaction,
Supply Management Policy Group

FUNCTIONAL AREA: Supply

REQUESTED CHANGE:

a. **Title:** Processing Cooperative Logistics Supply Support Arrangement
(CLSSA) Requisitions

b. **Description of Change:** This change clarifies and provides a definitive policy relative to the use of Not Mission Capable Supply (NMCS) and expedited signal codes as they apply to Foreign Military Sales (FMS) requisitions. This change authorizes NMCS ("N") and Anticipated Not Mission Capable Supply (ANMCS) ("E") conditions for FMS CLSSA requisitions. Additionally, the change authorizes the use of Expedited Handling Signal "555" and Expedited Transportation signal "777" on FMS CLSSA requisitions. The application of any of the aforementioned codes being proposed for FMS use is restricted to CLSSA (programmed and non-programmed) requisitions. This reserves the use of Expedited Handling Signal "999" for use solely by U.S. Forces.

c. **Procedures:**

(1) Change Chapter 2, paragraph C.4.b. to read as follows:

"b. Enter N in rp 62 of requisitions applicable to NMCS conditions originating at activities where forces in CONUS are not alerted for deployment. **NOTE: FMS CLSSA requisitions applicable to NMCS conditions will contain an "N" in rp 62 which will identify transactions related to critical items and requiring expedited handling.**"

(2) Change Chapter 2, paragraph C.5.b. to read as follows:

"b. Enter E in rp 62 of requisitions applicable to ANMCS conditions. **NOTE: FMS CLSSA requisitions applicable to ANMCS conditions will contain an "E" in rp 62 which will identify transactions related to critical items and requiring expedited handling.**"

(3) Change Chapter 2, paragraph C.7. to read as follows:

"7. Commanders will approve, or delegate in writing to specific personnel, the authority to approve, all NMCS/ANMCS requisitions by the most expeditious means. **Commanders of the**

Service ILCOs will approve, or delegate in writing to specific personnel the authority to approve, all FMS CLSSA requisitions applicable to NMCS or ANMCS conditions. NMCS/ANMCS requisitions will be submitted only for parts required for installation on or repair of mission-essential systems and equipment, without which the Commander is unable to perform assigned Service operation/mission."

- (4) Change Chapter 3, paragraph C.5. to read as follows:

"5. When system-wide inventory levels do not permit positive supply action on all requisitions within a given PD, supply procedures will provide for a release of demands containing the specifically designated OSD/JCS project codes and code 999 in the RDD field as the respective most urgent. PD 01-08 requisitions, *including FMS CLSSA requisitions*, containing Expedited Handling Signal 555 or Expedited Transportation Signal 777 in the RDD field and other requisitions/material obligations will be processed for release under paragraph A.2., this chapter."

- (5) Change Chapter 3, Figure 3-1, Requisition Processing and Related Transactions, to renumber item 6 under Required Delivery Date as item 9. Add new items 6, 7, and 8 as follows:

6. If Service Code in rp 30 is B, D, K, P, or T and there is an N or E in rp 62 and rp 35 is not U or V, blank the entry in rp 62 and process using the priority.

7. If Service Code in rp 30 is B, D, K, P, or T and Expedited Handling Signal 555 is in rp 62-64 and rp 35 is not U or V, blank the entry in rp 62-64 and process using the priority.

8. If Service Code in rp 30 is B, D, K, P, or T and Expedited Transportation Signal 777 is in rp 62-64, and rp 35 is not U or V, blank the entry in rp 62-64 and process using the priority.

- (6) Change Chapter 6, paragraph C.2. to add subparagraph e. as follows:

"e. *FMS CLSSA NMCS or ANMCS Requisitions:*

(1) *Approved FMS CLSSA NMCS or ANMCS requisitions will contain an "N" or "E" in rp 62 and rp 63-64 will be left blank.*

(2) *CLSSA PD 01-08 requisitions containing Expedited Handling Signal 555 or Expedited Transportation Signal 777 in rp*

62-64 will be processed in accordance with Chapter 3, paragraph A.2.

(3) Only CLSSA requisitions, containing a "U" or a "V" in rp 35 and a ~~CLPSC 1 in rp 72~~, are authorized the use of either the "N" or "E" in rp 62 or "555/777" in rp 62-64."

- (7) Change Chapter 6, paragraph N. to add new subparagraph 2 and renumber existing subparagraphs 2 and 3 as subparagraphs 3 and 4. Add new subparagraph 2 as follows:

3. Only FMS CLSSA requisition modifiers, containing a "U" or a "V" in rp 35, are authorized the use of either NMCS or ANMCS conditions ("E" or "N" in rp 62) or Expedited Handling Signal or Expedited Transportation Signal ("555" or "777" in rp 62-64).

- (8) Change Chapter 6, paragraph O. to add subparagraph 6. as follows:

"6. Presidential Determination or Drawdown Requisitions. Release of these requisitions will be in accordance with Chapter 3, paragraph A.2."

- (9) Change Chapter 6, paragraph Q.1. to read as follows:

"1. Consolidation. The shipment planning process should recognize and assure compatibility of codes in requisitions and related documents when configuring shipment units. CLSSA requisitions with an "N" or "E" in rp 62, or "777" in rp 62-64, will not be held for consolidation, but the NOA requirements remain in effect. To assure compatibility of codes, rp 30-34, rp 45-50, and rp 57-61 must be considered for FMS non-assembly shipments; rp 55 and 56 must be considered in addition to rp 30-34, rp 45-50, and rp 57-61 for FMS assembly shipments; and rp 30-33, rp 35, and rp 57-61 must be considered for Grant Aid."

- (10) Change Appendix C2, rp 62-64, to read as follows:

Required 62-64	Will normally be left blank.	Delivery
Date	will be made when conditions meet the established criteria.) CLSSA requisitions may contain an "E" or "N" in rp 62 (rp 63-64 will be left blank). CLSSA requisitions may also contain Expedited Handling Signal 555 or Expedited Transportation Signal 777.	

- a. Currently, MILSTRIP indicates expedite handling signal "999" is applicable to OCONUS/deploying CONUS forces only and explicitly states that it does not apply to FMS and Grant Aid requisitions. However, MILSTRIP does not definitively state whether other NMCS conditions apply to FMS. Relative to NMCS code "N," MILSTRIP appears to limit its application to non-deploying CONUS forces, implying that it does not apply to FMS requisitions. The application of ANMCS code "E" is less specific, however, it can be inferred that the restrictions associated with codes "999" and "N" are extended to the use of this code. MILSTRIP only references priority designator conditions relative to the use of expedite signals "777" and "555," implying their use on FMS requisitions is authorized.
- b. The above policy/guidance in MILSTRIP relative to the authority to use NMCS and expedite signal codes on FMS requisitions has been interpreted and implemented differently by the Services and DLA. In some instances, the agreements/cases Services have with the foreign governments authorize the use of NMCS codes and specify additional fees for the processing costs associated with the use of these codes. However, DLA ICPs do not recognize or respond to NMCS or expedite signal codes on FMS and Grant Aid requisitions. This difference in policy interpretation results in dissatisfied FMS customers who believe their agreements are being violated and that they are not receiving the level of service they are paying for.
- c. DoD 5105.38-M, Security Assistance Management Manual (SAMM), states FMS CLSSA requisitions will be processed the same as DoD requisitions. Nevertheless, not all Services/Agencies process FMS CLSSA requisitions the same as DoD requisitions. This proposal would continue to reserve the highest NMCS code Expedited Handling Signal "999" for U.S. Forces, ~~providing them precedence relative to stock allocation~~, while authorizing the use of NMCS and ANMCS codes "N" and "E" for CLSSA requisitions. This would result in CLSSA requisitions receiving the same level of service as U.S. Forces, less "999" Expedited Handling Signal, when materiel is available, and, when materiel is not available it would allow the CLSSA requisitions to have a higher precedence, relative to stock allocation, than all other requisitions of equal priority, ~~less U.S. Forces NMCS and JCS project code requisitions.~~

AGES:

a. Advantages:

- (1) Standard policy and procedural integrity throughout the DoD components.
- (2) Stock allocation precedence for U.S. Forces.

(3) Expedited processing capability for U.S. Allies.

(4) FMS CLSSA customer support commensurate with payment.

b. **Disadvantages:** Costs associated with automated supply system modifications.

anges to policy contained in DoD 4000.25-1-M (MILSTRIP), DoD 5105.38-M (SMM), and the Service/Agency implementing regulations. Requires Service/Agency supply procedures and FMS case agreement practices to conform to a single policy. Requires modification to Service/Agency automated supply systems to recognize and process requisitions using the new definitive policy.
